

Macurco™ Combustible Gas Detector

GD-6

Detector, Controller and Transducer

Methane, Propane or Hydrogen Gas Detection

The GD-6 is a versatile, easy-to-use device that allows you to select between methane, propane or hydrogen gas detection. Combustible gas detectors will respond to a wide range of hydrocarbons, including aerosol sprays, cleaning solvents, paint thinner and other common volatile organic compounds. This low voltage detector provides automatic feedback and fan or valve control that can help reduce combustible gas concentrations in parking garages, battery rooms, maintenance facilities, and other locations that require combustible gas detection.

Selectable options include:

- Target Gas: Methane (NG), Propane (LP) or Hydrogen (H₂)
- Output: Fan relay, Alarm relay and 4-20mA current loop
- Controls: Digital display (0-50% LEL), buzzer, fan delay, fan minimum runtime

Installation

- Mounts on a standard 4" x 4" electrical box
- 5 A SPDT fan relay controls valves, louvers or exhaust fans
- 0.5 A N.O. or N.C alarm relay connects to warning devices or control panels
- 4-20mA current loop - compatible with the Macurco DVP-120 Control Panel
- Factory calibrated

Other Features

- Supervised system design: detector problem will cause the fan & alarm relay to activate
- Optional calibration kit allows the GD-6 to be field tested and calibrated
- ETL Listed to UL 61010-1, CAN/CSA C22.2 No 61010-1

Location

A GD-6 is usually located in areas where there is potential for gas leaks; where there are gas appliances, areas through which gas pipes pass, where batteries are being stored or charged, etc. DO NOT mount the GD-6 in a corner. DO NOT mount the GD-6 where the normal ambient temperature is below 0°F or exceeds 125°F (-18°C to 52°C). If the target gas is lighter than air; natural gas (Methane) or Hydrogen (H₂), mount the GD-6 high on a wall or column about one foot down from the ceiling. If the target gas is heavier than air; propane (LP), mount the GD-6 low on a wall or column one foot above the floor. Use the same spacing as for smoke detectors, 30 foot centers, 900 square feet per detector.
