

**IT HAS BEEN A LONG WAIT FOR
INNOVATION IN FOAM TECHNOLOGY**

THE WAIT IS OVER RE-HEALING FOAM LEADS THE WAY

Challenging the status quo and ourselves is how Solberg RE-HEALING™ Foam began. But it wasn't born overnight. For fifteen years we formulated, extensively tested and refined this first, truly authentic fluorosurfactant and fluoropolymer-free foam concentrate. We wanted to create a foam that would leave no harmful footprint on the environment – and we did. But first, and most important, it had to perform as well as – or better than – AFFF foams. It does.

RE-HEALING Foam has proven exceptional performance for flame knock-down, fire control and extinguishing time. It moves rapidly across surfaces, forming a thick, wet blanket for superior vapor suppression, and has a long drain time for greater burn-back resistance. It's that good.

A Better, Safer Solution FOR FIREFIGHTERS

Testing RE-HEALING Foam's performance didn't just happen in a lab. We put on the boots and the turn-out gear and faced the fire ourselves. Many fires, in many different scenarios. We had to be absolutely sure RE-HEALING Foam was the right – the best – firefighting solution for protecting life and property. What we learned is whether it's a wildland, structural or industrial fire, RE-HEALING Foam knocks it down and keeps it down.

Our foam concentrates are respected world wide for superior performance.

RE-HEALING™ FOAM
AUTHENTIC FLUORO-FREE

Solberg also offers RE-HEALING™ Training Foam, which is specially designed to let firefighters train more often. It is intended for use on Class B fires in a controlled environment. Better trained firefighters are safer firefighters. Training Foam is NOT intended to be used in an actual fire situation.

SOLBERG — A FOAM FOR EVERY APPLICATION

Tougher Environmental Regulations WILL DEMAND IT

Regulatory action is being taken around the world to limit fluorine in the environment. Select countries in Asia and Europe already have regulations in place. You can be prepared right now for inevitable regulations with Solberg RE-HEALING Foam. It is the first, true 100% fluorosurfactant and fluoropolymer-free foam concentrate with no environmental concerns for persistence, bioaccumulation or toxic breakdown. Gone in 40 days, it leaves no harmful footprint behind.

No Need For SPECIAL EQUIPMENT

Non-air aspirating discharge devices as well as air-aspirating discharge devices can be used to obtain maximum results. RE-HEALING™ Foam is also the first fluorosurfactant and fluoropolymer-free foam to be certified with fire sprinklers. RE-HEALING Foam concentrates can be proportioned at the proper foam solution percentage using common foam devices.

- Line eductors
- Self-educting nozzles
- Low and medium expansion devices
- Hand-line nozzles
- Branch pipe nozzles
- CAFS
- Fire sprinklers

RE-HEALING FOAM MEETS STRINGENT CERTIFICATIONS

EN

Product certifications vary dependent upon concentration type.

Available in:

- 1%, 3%, 6%
- 3x3% ATC™
- 3x6% ATC™

Hardware value-engineered for you

As a custom manufacturer, we tailor firefighting foam hardware to meet your specifications. You can count on us to work with you and deliver products that perform as needed, when you need them.

Balanced Pressure Proportioning Systems

- Bladder tanks
- Pre-piped bladder tanks
- Balanced pressure pump sets or skids
- Inline balanced pressure

Discharge Devices

- Foam chambers
- Foam makers
- Foam monitors
- Hose reel stations

Mobile Products

- Tote trailers
- Foam proportioning trailers
- Foam carts

HAVE QUESTIONS?
